DreamJob

A Job & Referral Tracking App for Freshers
Product Management Case Study

The Problem

- Freshers apply on multiple platforms like LinkedIn, Naukri, Email, and Referrals
  - No single place to track job status and recruiter communication
  - Missed follow-ups often lead to lost interview opportunities
  - Resumes fail ATS systems due to poor keyword matching

User Research

- Interviewed 5 job seekers and final-year students
  - Each user applies to 10–15 jobs per week
  - Common frustration: missed recruiter emails and lost tracking
  - Quote: “I missed an interview email because my notifications were off.”

Key Insights

- Users lack a structured system to track applications
  - Referral follow-ups are rarely done consistently
  - Missed recruiter responses directly impact hiring chances
  - Users are confused about ATS-friendly resume keywords

The Solution — DreamJob

- One dashboard for all job applications
  - Referral tracking and automated follow-up reminders
  - Email sync for recruiter replies and interview alerts
  - Resume keyword helper for ATS improvement

MVP Features

- Must Have: Add jobs, status tracking, follow-up reminders, referral tagging, email sync
  - Nice to Have: Resume scanner, analytics dashboard, Chrome extension, smart suggestions

User Journey

- Sign Up
  - Connect Email
  - Add Job
  - Set Follow-Up
  - Track Status
  - Get Interview / Offer

Success Metrics

- North Star: % of applications receiving recruiter responses
  - Weekly Active Users (WAU)
  - Follow-ups completed per user
  - Interview conversion rate

Product Roadmap

- Month 1: MVP — Manual tracking, reminders, referral tags
  - Month 3: Automation — Email sync, LinkedIn import, analytics
  - Month 6: Intelligence — Resume keyword scanner, smart follow-ups

Business Model

- Freemium Model
  - Free: Track up to 20 jobs, manual tracking, basic reminders
  - Premium (₹99/month): Email sync, resume keyword tool, unlimited tracking, analytics

Thank You
